

Nano Pro MT™ Marine Grease

Q. What NLGI grade is Nano Pro MT™ Marine Grease?

A. Nano Pro MT™ Marine Grease is a NLGI Grade # 2

Q. What is the base used for Nano Pro MT™ Marine Grease?

A. Nano Pro MT™ Marine Grease uses an over based Calcium Sulfonate base grease fortified with our proprietary Nano materials.

Q. Can Nano Pro MT™ Marine Grease be used on motor vehicle wheel bearings, chassis or other components?

A. Yes, Nano Pro MT™ Marine Grease is an GC-LB NLGI rated chassis and wheel bearing grease that works well under wet weather conditions such as rainstorms, snow and ice.

Q. Will I experience pumpability and spray off issues common with traditional marine greases?

A. No, Nano Pro MT™ Marine Grease has been designed to perform exceptionally well under semi-aqueous conditions.

Q. Can I use Nano Pro MT™ Marine Grease on my locking pin on my fifth wheel?

A. Yes, Nano Pro MT™ Marine Grease will handle the harsh loads and other conditions of a fifth wheel without the drying or flaking of Moly based greases.

Q. What is the maximum operating temperature of Nano Pro MT™ Marine Grease?

A. 600+ degrees Fahrenheit

Q. What other uses does Nano Pro MT™ Marine Grease have?

A. Nano Pro MT™ Marine Grease is perfect in many applications that traditionally have used Red #2 Lithium based greases such as heavy equipment (Construction or agriculture), pumps and pulleys, trailer fifth wheels, landing gear, and more.
